In brief

The VPN stands for the Virtual Private Network which helps in changing your IP address to a secure server. By changing your IP address, you will be easily anonymous online and can also change your mobile or laptop location.

The VPN stands for the Virtual Private Network which helps in changing your IP address to a secure server. By changing your IP address, you will be easily anonymous online and can also change your mobile or laptop location. Are you looking for the best VPN services for your computer right now? If yes, then let's go through some of the best VPN services right now itself.

ExpressVPN

It is one of the best and reliable VPN services right now. It is the perfect all-round option for unblocking websites, privacy, and speed. ExpressVPN provides access to more than 3000 servers in more than 100 locations worldwide and also you will get the widest platform support across 94 countries. It also provides routers with VPN browser extensions and custom firmware which makes it a reliable service.

The only downside of ExpressVPN is that it only handles 5 simultaneous connections per user and also comes with a price tag. If you are only looking for speedy service with the top-notch features, then you should go for the ExpressVPN without any second thought. You should remember that to avail the service, you need to pay for it. They do not give a free trial, but you can get your money back if you are not satisfied with the service.

NordVPN

The NordVPN is located in Central America and offers access to more than 5000 servers in more than 60 locations all around the world. It supports 6 devices at the same time with a 2048-bit encryption. The performance of NordVPN is really strong for the short connections and only downside is the privacy policy. One of the best things is its user-interface which is very simple to understand and you would not feel any issues while using it for sure. If you want to access NordVPN services, then you can take the monthly subscriptions or a three-year offer. NordVPN also offers a 7 days free trial and you can try it first.

ZoogVPN

ZoogVPN is not a big VPN services provider like NordVPN, but it is helping in satisfying the user needs and trying to overcome several security threats as well as online restrictions. It does not have high encryption levels and features which come with famous VPNs such as NordVPN and ExpressVPN. It offers an affordable and basic VPN service with higher perks at very cheap prices. If you are a beginner, then you should always choose ZoogVPN services only.

It has a small network of only 30 servers across 21 countries. If you are a paid subscriber, then you would get the unlimited bandwidth. You can easily access restricted services such as Amazon Video, Hulu and Netflix. It cannot help you in blocking BBC iPlayer and also does not work in Egypt and China. It uses only 256-bit encryption and includes various protocols like PPTP and OpenVPN.

At last, you are aware of the top 3 VPN services which you can use it right now. You can choose the best VPNs by considering your overall needs.
