In brief

Mobile gaming has been getting increasingly more popular in the last few years. With younger people now more frequently being allowed access to mobile devices, this isn't all that surprising.

Mobile gaming has been getting increasingly more popular in the last few years. With younger people now more frequently being allowed access to mobile devices, this isn't all that surprising. Another thing that may be helping the mobile game market grow so quickly is the fact that many popular games have been making a move online. Popular PC and console titles like Fortnite, PUBG, and Diablo now have mobile alternatives or mobile versions that even work across different gaming platforms. With over 6 million apps on the google play store right now, choosing what you want to play has never been harder. That's why we're here with a list of the most popular game genres on android right now to give you a nudge in the right direction.

Casino Games

You'd be surprised by the number of people that love playing casino games. The amount of casino inspired and casino themed games on the android market right now is staggering. Mobile versions of poker, slot machines, roulette, blackjack, and many others are created every other day by different game developers, and all of them bring something new and interesting to the table. That's all sticking to the play store. Third-party apps and many legitimate websites out there offer real rupees casino game options which are also quite popular. These can also include a plethora of game options, so many even, that a lot of people are ditching traditional casinos and opting out to play at the ones online.

MMORPGs

If you are one of the people that grew up playing classic MMORPGs like RuneScape, World of Warcraft, and Perfect World then you'll be happy to find out that the world of android gaming has everything you need to feel right at home. Fortunately for many, MMORPGs never went out of style and game developers have been trying really hard for years to transfer the immersive experience you get when playing them on PC to mobile. A lot of attempts have been successful. Android boasts quite a few titles like World of Kings, Black Desert Mobile, and even a mobile version of Perfect World for those that want to get hit by a wave of childhood nostalgia.

Strategy Games

Back in the day strategy games were all the rage on PC. Everyone wanted to build their own empire, create an army, and use it to bring their enemies to their knees. Strategy games lost steam for a while but they made quite the resurgence a couple of years later on mobile. Turns out the strategy game mechanics were perfect to be adapted for mobile. The gesture and touch controls work seamlessly for these types of games, and the portability of mobile devices makes some of the boring parts like waiting for workers to finish building a lot more bearable.

While Android 10 rolled out some cool new features to the software, we can't wait to see what Android 11 brings to the table and what it could mean for the future of strategy games and mobile gaming in general. Some of the most popular strategy titles on android you can check out right now are Clash of Clans, Plague Inc., and Tropicco.

Racing Games

Racing games are the most popular on android amongst the younger generation. While everyone enjoys a good racing game, kids adore the thrill of simulated driving. Mobile gives us a lot of interesting ways to incorporate the design of the device into gameplay, so the intuitive controls turn the phone itself into a steering wheel. Even though Battle Royale games are quickly catching up as favorites for our youngest, racing games are still holding strong and releasing new and updated versions of popular games regularly. If you're looking for a racing game to try out, go for some in the Asphalt series available on the google play store.
