## Certification Overview

Professionals got used to taking Microsoft exams in MTA, MCSA, MCSD, and MCSE level categories. But with the recent changes incorporated in the qualifying program by the vendor, candidates are warming up to the newly introduced role-specific exams as well as certifications. These are targeted at preparing professionals to earn credentials according to the position you are going to apply for: developer, solutions architect, administrator, functional consultant. As for the levels, instead of four, Microsoft has left only three. They include:

- Fundamentals
- Associate
- Expert

This new role-based approach is going to be a game-changer in the IT world. Hence, now database-related professionals need to prepare for these changes effectively.

You should also remember the updates are yet to affect some of the existing exams, while applicants can still register and sit for exams like 70-461 as they're still on offer. The SQL Server technology is helpful as database management is something organizations will always need.
