Bottom line

Android Lollipop and iOS 8 each bring distinct strengths to the table. Android Lollipop offers greater flexibility across a wide range of devices, customizable app management, and competitive pricing, while iOS 8 delivers a polished, vibrant design and consistently strong performance.

Apple and Google are tech giants, both of them regularly updates their mobile operating systems. These new versions of mobile OS bring some exciting features that are valuable for people. Recently, Apple and Google launched their new mobile OS: iOS 8 and Lollipop respectively. Both mobile platforms have their own unique features and benefits. Android is well known for its flexibility with many devices, better management of applications, competitive prices etc while iOS is known for its vibrant design and extraordinary performance.

But many people still get confused when they have to buy a new smartphone. Hence, Nine Hertz has developed a beautiful infographic that will let you compare both Android Lollipop and iOS 8 with their fantastic features and entire journey from the beginning.
