In brief

Finally, after several months of beta testing, Asus Zenfone Max Pro M2 and M1 are expected to receive the Android 10 update on June. But unfortunately, the release did not happen yet.

Finally, after several months of beta testing, Asus Zenfone Max Pro M2 and M1 are expected to receive the Android 10 update on June. But unfortunately, the release did not happen yet. The company was testing with the beta version of the Android 10 for the past 6 months and was not confident to release the stable version to the public.

Due to some glitches and bugs, the update has been postponed further. Earlier the company announced on Twitter and stated that the Android 10 update will be available starting June 12, 2020. But the release was again a beta version and still under testing.

There are several Asus Zenfone Max Pro M1 and M2 phone users who have tweeted on Twitter and mentioned about the possible updates coming soon. Most of the users are not sure about this update but they are excited about it. Users are expecting a stable update this time so that they would be able to experience the new features of Android 10. The company earlier promised that the stable Android 10 update for the device will be available in May but the users received the May security patch update. You can even check out on your phone by going through the setting options right now.

Asus Zenfone Max Pro M2 Android 10 Update

As per the latest information, the company is planning to release the stable Android 10 version to its Max Pro M1 and M2 users. But the date is not yet announced. So it is clear that Max Pro users have to wait further for a stable version.

Asus Zenfone Max Pro M1

The Asus Zenfone Max Pro M1 features come with a big 5.99 inch full HD display and powered by Snapdragon 636 processor. It currently runs on Android 8.1 Oreo and available in 3GB, 4GB, and 6GB RAM variants. The dual camera includes 13MP and 5MP sensors with f/2.2 and f/2.4 apertures respectively. It has a longer battery life of 5000mAh which is enough to watch movies, listen to songs and play games without any hassle for sure. It provides decent performance and great camera quality for taking high-quality pictures. With the new Android 10 update, users' experience will be even better and smooth without any lags or bugs issues.

Like most of the other updates, the Android 10 update will be available in a phased manner to everyone. You would be able to view the OTA update notification after June 12 depending upon your location and region. It would be better for you to understand that the entire update process will take more than 3 weeks to complete and you need to wait until the update is made available for your phone. It is also possible to verify the update presence by tapping the settings menu manually.

Conclusion

At last, by considering all the past and recent information into account, we can proudly say the Asus Zenfone Max Pro M1 has decided to roll out Android 10 update very soon for its users worldwide. After getting the Android 10 update, users will have access to some new features which include focus mode, dark theme, Live caption, and even enhanced privacy tools. The latest update from the Asus hints at the arrival of Android 10 in the coming days. Users need to wait a bit further to find out about this on their devices.

We will update you after getting the relevant information related to the Android 10 update for the Max Pro as soon as possible for sure.
