Of late, there is no need to carry an additional notepad while going out when you can easily install a notepad app on your Android device. With the help of these note-taking apps, you can easily make all your vital notes easily without any hassle. With so many options available, it is really difficult to choose the perfect note-taking apps for your Android smartphones. Are you looking for the best 3 Note taking apps for your Android device? If yes is your answer, then let's go through some of the best note-taking apps for your smartphone right now itself.

EverNote

With its great ability to capture digital information and exceptional organizational features, Evernote is one of the best and famous note-taking apps available for Android users worldwide. With the help of this great app, you can easily take notes in a different variety of formats, including audio, text, pictures, video and audio recording and many more. You can organize these notes into virtual notebooks and handled using tools such as shortcuts and tags. From external files to checklists, you can add anything to your notes. It is also possible to add reminders to notes and sharing with the other users via email. By using your Android camera, you can digitize and scan everything from business cards to documents in a snap.

Download from PlayStore

OneNote

OneNote is also one of the most widely used note-taking apps available for Android users. It allows you to capture everything and place it anywhere on a digital canvas. You can also write by hand (by using a stylus) and scan handwritten pages or notes. It would be better for you to understand that the app uses virtual notebooks for managing content and lets you find information either on all notebooks or on a single page easily without any problem. You can organize notes using custom tags labels, and also able to revise notes with ink annotations and highlights.

Download it on your mobile

SimpleNote

As the name suggests, Simplenote is one of the simplest note-taking apps available in the market for Android users. You would get an easy way to maintain notes, ideas and lists. Its core experience is all about efficiency and speed. You just have to launch this great app, type some notes and you are done. It is easy to create many notes as you want, and also edit them whenever you want to do. After having some sizeable collection of notes, you can easily use pins and tags to organize them. The user interface of the app is very simple and easy to understand for the users. You are not going to face any issues while using this app for sure. It also has some collaboration and sharing features which would make it even more helpful.

Download

Finally, you are aware of the best 3 note-taking apps for your Android device. So, what are you waiting for? Download any of them right now and share your experiences here.
