### In brief

Mi is known for introducing new and best quality products at a low price. The company already proved the same with mobiles, laptops, and other accessories.

Mi is known for introducing new and best quality products at a low price. The company already proved the same with mobiles, laptops, and other accessories. Recently Xiaomi entered the laptop market with their Mi Notebooks. The Mi Notebook series comes with the best in class configurations and a comparatively lesser price.

It is now revealed that the company will introduce a new wireless charger that supports quick and efficient charging than wired chargers. For a long time, we all believed that wireless charging is comparatively slower than wired charging, and it was right in most cases. But as per Mi, the new Mi wireless charger is an 80W charger, and it is claimed to charge a 4000mAh smartphone battery in 19 minutes.

However, the new Wireless charger from Mi is yet to release. The company has not revealed the release and availability. Here, we are looking at some of the best and low cost wired Mi Charger here.

### India Standard Charger (2A Fast Charging)
