In brief

Instagram highlights are a fantastic way to store and showcase your favorite stories permanently. However, Instagram does not provide an option to view someone else's highlights anonymously or download them for later use.

Instagram highlights are a fantastic way to store and showcase your favorite stories permanently. However, Instagram does not provide an option to view someone else's highlights anonymously or download them for later use. Fortunately, several third-party apps and websites allow you to do this easily and securely.

In this article, we check the best Instagram highlight viewer apps available in 2025, covering their features, pricing, and limitations to help you choose the right tool.

Top 10 Instagram Highlight Viewer Apps

1. Glassagram

Glassagram is one of the most powerful Instagram highlight viewers, offering advanced features such as real-time updates, profile analytics, and multi-account support. It works with public accounts and even provides limited access to some private accounts.

- Pricing: Free.
- Limitations: The interface can be cluttered with ads.

How to Choose the Right Instagram Highlight Viewer App

When selecting a third-party Instagram highlight viewer, consider the following factors:

1. Free vs. Paid

- Free tools like StoriesDown and InstaDP are suitable for casual users.
- Paid options like Glassagram and Msafely provide advanced analytics and monitoring features.

2. Public vs. Private Accounts

- Most free tools only work with public accounts .
- If you need access to private highlights , Msafely is the best option, but it requires proper device setup.

3. Security and Privacy

- Avoid apps that ask for your Instagram login credentials .
- Opt for secure tools like Inflact and IGComment's Highlight Viewer that do not require personal account access.

Conclusion

Whether you need a quick and free Instagram highlight viewer or an advanced tool with tracking capabilities, there are plenty of options available. If you are looking for a simple and free solution, tools like StoriesDown and InstaDP are great. If you need more features like analytics, tracking, and private account access, Glassagram and Msafely are worth considering.

Regardless of the tool you choose, always prioritize privacy and security by using apps that do not require your Instagram login details. Happy exploring!
