Nowadays, you can find several ultra-wide monitors available online for users all around the world. Many people prefer using ultra-wide monitors due to their great features and benefits to the users. These wide range monitors provide a hassle-free experience for multi-purpose users.

With the help of the split-feature, you would be able to separate windows on the same screen to increase the productivity levels easily without any issues at all. You would be glad by knowing that there is no need for a separate set up if you are planning to buy an ultra-wide monitor in the coming weeks for sure, it is all in one for everyone.

These ultra-wide monitors are used by officers to reduce the workload and enhance efficiency and for gaming purposes, people prefer wide monitors. You should note that these ultra-wide monitors are perfect for gaming as well. The pixels are smooth and clear and best in terms of almost everything. With so many options available in the market, it becomes difficult for the consumers to buy a perfect and genuine for sure.

If you are looking for the best ultra-wide monitor to buy in 2020, then you are in the right place. Here you would come to know about the best ultra-wide monitor to buy in 2020 right now!

Samsung CJ791

Are you looking for a smooth and stylish ultra-wide monitor? If yes, then you should consider buying a Samsung CJ791 without any second thought. This monitor offers you all the features which you are looking for in an ultrawide. The size is 34 inches and the resolution of 3440 *1440p. Also, you should note that CJ791 is a 10-bit panel which means that it is capable of more than one billion colors.

It takes the help of quantum dots to make it more accurate in color than the old LED-backlit LCD computer monitor. If you are into gaming, then you should consider Samsung CJ791 as it offers the best performance to all gamers. Two USB Types-A ports are included for attaching peripherals. There are two speakers on board which are perfect for daily work. It is a very great Samsung effort for the users.

Alienware AW3420DW

It is one of the best ultrawide monitors for gamers with a 34-inch display. It comes in the color of Lunar White, combined with a few back elements which give a luxurious look and feel. You are going to access several USB 3.0 ports. There are also upstream USB ports that allow you to connect a cable from your laptop or computer to a USB hub.

If you editing videos or working on large excel spreadsheets, then it is great for multitasking. The 120Hz with G-sync ensures that famous games like Doom, Apex Legends, and Fortnite at the highest levels, the games will run smoothly and with a decent GPU, you can easily notice that. It is available at an affordable price and you can easily get it online,

Philips 346B1C

The Philips 346B1C is another amazing mid-range ultrawide monitor that does not skimp on features. It offers a 34-inch Quad HD display which gives you excellent resolution, and a built-in KVM switch allows you to flip between several inputs. There are two HDMI 2.0 ports, one DisplayPort, and built-in speakers, with dedicated modes to decrease blue light, view two sources at once, and also to save energy.

If you are working from home, then you should consider Philips 346B1C for the best performance so that you would be able to increase your productivity while working at home. It also helps in saving energy which would help reduce your electricity bill for sure. If you are working from home, then you can go for this ultra-wide monitor for better performance.

Acer Predator Z35P

If you prefer to game in the dark, then it is the right time to use Acer Predator Z35P. It is bigger at 35 inches, and also has the perfect aspect ratio and resolution and even the screen is curved too. There is low input lag, response time is great and its 100Hz refresh rate can be overclocked up to 120Hz. It has much better viewing angles, which helps in giving a better view to the users.

If dark room performance is more vital to you, then you should always consider Acer without any second thought. The large resolution screen is better for multimedia and gaming and makes it everyone to do multitasking without any issues at all. There is a decent monitor for media creation. The large, high-resolution screen allows you to see more of your project without any need of zooming out. You can experience minor image distortion on the curved screen and the Adobe RGB is not perfect for video editing or professional photo.

Acer Nitro XV340CK

Acer Nitro XV340CK is a good monitor for most uses. It has a fast response time, so motion in games and movies looks clear with little blur. Unfortunately, it does not support HDR, and the Adobe RGB coverage is less than ideal for professional use. The 34-inch screen has very good ergonomics, with a stand that allows for a wide amount of height and swivel adjustments.

It also has a good amount of inputs including two USB 3.0 ports so that you would be able to use a hub without needing to plug your devices into the back of your computer. You should note that it has excellent response time at its max 144Hz refresh rate and even when lowered to 60Hz, it is still very smooth. The Acer Nitro XV340CK is perfect for gamers as you would be able to play your favorite games easily without any lags at all.

Conclusion

Finally, you are aware of the best ultra-wide monitor to buy in 2020 for your overall requirements. All the above-mentioned ultra-wide monitors are perfect to use and you would love using for them for sure. They offer the best performance and also very affordable to buy for everyone. Just go for it and share your valuable experiences here with us right now!
