You are advised to be flash the Stock ROM first.. Although it is not necessary according to developer's view... But if you face any problem... Flash stock first... If you follow these steps properly, you will successfully install the ROM or else you wont. It may leads to Bricking your Phone or other security issues. I'm not Responsible for what happens on your phone.

### Downloads

## 1) The COD ROM - CoDRoMv1.zip

Download The COD ROM ZIP

## 2) GAPPS - Download

## 3) ClockworkMOD for Y - Download

## 4) Extended Power Menu (EPM) - Download (Optional)

## 5) Non Transparent MOD Patch - Download (Optional)

## 6) Silver Lockscreen MOD Patch - Download (Optional)

Steps to Install

- 1) Backup your System first using CWM (Needed)
- 2) Download ROM file and GAPPS...
- 3) Now copy both files to the SD Card. Do Not put it in any folder. It should be in the root of SD card.
- 4) Turn Off your Device and go to Recovery Mode By Pressing and Holding this Key Combination Volume Up + Home Button + Power Button .
- 5) Once you entered into the Recovery Mode. You will see the Blue Color User Interface where you can't use Touchscreen. Instead use "Volume Up and Volume Down to move Up and Down". And "Home Button to Select". And "Power Button used to go Back"
- 6) Once you entered into Recovery Mode, select "Wipe Data/Factory Reset" option and press ok, apply to all option.
- 7) Then, select "Apply Update from SDCard" option and choose downloaded ClockworkMOD which is "Chobits\_CWM\_DUOS.zip ".
- 8.) When you're in ClockworkMOD Recovery, You should Wipe your Data/Cache by selecting "wipe data/factory reset" and "wipe cache partition" to make this ROM Work Properly.(Needed) - Wipe Dalvik cache by selecting "Advanced->Wipe Dalvik cache" (Optional)
- 9) After wipe, select "Install zip from sd card" option. And then "choose zip from sdcard", Now browse the The COD ROM which is "CoDRoMv1.zip"...
- 10) After ROM Flash done, You have to Reboot your Phone by select "Reboot System Now". For the first System Start-Up it will take much time to start. May be 2-4 min (may vary) So be Patience.
- 11) Work around in the ROM for 10-15 minutes... See whats inside the ROM and work around...
- 12) After 15 minutes, Go to recovery again and select ClcokworkMOD again, now choose "Install zip from SD Card" again to apply the GAPPS.zip... (In this step no need to Wipe any Data.)
- 13) Once Patching was successful. You have to Reboot your Phone by select "Reboot System Now". For the first System Start-Up it will take much time to start. So be Patience.
- 14) Thats all the ROM is successfully installed in your phone. Enjoy.

Note : I followed the above steps in my galaxy y and succeeded. Try at your on risk, I'm not Responsible for whatever happens to your phone. So please do it carefully.
