In brief

It's quite common for iPhone users to encounter iPhone stuck issues. Especially when you try to update the iOS version or transfer any corrupted file from iTunes or any other portal, you may see the screen freezing on the white display with the Apple logo at the center.

It's quite common for iPhone users to encounter iPhone stuck issues. Especially when you try to update the iOS version or transfer any corrupted file from iTunes or any other portal, you may see the screen freezing on the white display with the Apple logo at the center.

This is because your iPhone temporarily enters the hang mode, and you won't be able to perform any operation on the same. Therefore, it is better to know more about the problem-fixing method than visiting the Apple care center every time.

So, let's look at the best ways to fix iPhone stuck on Apple logo with an effective iOS system repair tool and a couple more methods.

What Causes iPhones to Get Stuck on Apple Logo?

For several reasons, you can face iPhone stuck on the Apple logo white screen. Some of the reasons are explained in brief in the below section.

1. While trying to proceed with an iOS system recovery after downloading any corrupted file from iTunes or the Apple play store, the mobile can enter the temporary hang mode, showing a white screen and the brand's logo.
2. When you put the iPhone on an update for the operating system, and the process is interrupted in between, it can lead to iPhone 11 stuck on Apple logo.
3. Sometimes, when you jailbroke the iPhone, the system can go into hang mode, showing the brand logo and the white screen.

Ways to Fix iPhone Stuck on Apple Logo

Since you know the answers to why my iPhone is stuck in Apple logo, it's time to know some of the best ways to get the issue fixed. Of course, there are different resolutions, but we have introduced you to the most prominent one so that you won't have any further problems fixing the issue yourself.

1: Using Dr.Fone System Repair

Although there are many ways to proceed with iOS system recovery, the best option is to use an all-rounder or comprehensive tool like Dr.Fone System Repair, which allows you to fix the white screen of death issue in just a couple of steps. Plus, it does not corrupt any file, deletes data from the phone, or bring any significant change like complete formatting or loss of all settings. It even works well for the recent iOS 16 and iPhone 14.

Key features

1. Dr.Fone System Repair can help upgrade/downgrade iOS without involving iTunes.
2. It allows you to fix the issue in standard and advanced modes.
3. Apart from helping you to fix your iPhone stuck on the Apple logo, it also helps to solve more than 150+ problems like boot loop, 1110 error, etc.
4. It works for all iOS devices and fixes most iPhone/iPad/iPod Touch system issues without data loss.
5. It is free to download and easy to use, ensuring you can resolve the white screen of death issue in no time.

Steps to fix iPhone stuck on Apple logo

Step 1: Launch the Dr.Fone application on your PC or Mac. The homepage will open up from here. Next, you need to click on the System Repair button.

Step 2: A new page will open showing two options- Android in green color and iOS in the blue box. Click on iOS if you want to deal with the iPhone.

Step 3: Once you are routed to a new white screen with an array of options, click on the iOS Repair box to begin the process.

Step 4: A huge list of iOS and iPhone problems will appear on the screen. Select iPhone stuck on Apple logo white screen or any other related option, then click Repair Now.

Step 5: Now select Standard Repair mode. This will ensure no data is lost during the iOS system repair process.

Step 6: Connect the iPhone to the computer or laptop. Next, click the Trust option on the pop-up box, followed by clicking the Entry Recovery Mode option.

Step 7: Detailed guidance and steps to be followed will appear on the screen. Select models like iPhone 7 or 8, iPhone 6 and earlier, and more.

Step 8: Once the recover mode is set, you will see a popup box on the screen with a continuously rotating blue circle.

Step 9: Now, you will get a complete list of iOS firmware. If you want to add the new upgrade to the operating system, click on one firmware and download it. You can see the download status from the screen of the chosen firmware. After downloading, you will see the system verifying the downloaded file.

Step 10: Once done, your model type and iOS version will be displayed on the screen. Now, click on Repair Now.

Step 11: After successful repair, click on the Done option, and the white screen of death will be fixed.

2: Fix iPhone Stuck on Apple Logo via Recovery Mode

Connect the iPhone to the computer if you do not want to use any third-party app. For this, you need to initiate the recovery mode to fix iPhone stuck on Apple logo. The following are ways it can be done in different iPhone models.

For iPhone 8 and later, press the volume up key and release it. Then press the volume down key and release it. After this, press the side key and hold it as long as you don't see the recovery screen.

For iPhone 7b and iPhone 7 Plus, press the sleep/wake button and volume down buttons and hold them for a couple of minutes until the recovery mode screen is activated.

For iPhone 6s and earlier, you need to press and hold down the home and sleep or wake buttons until you see the recovery screen.

3: Fix iPhone Stuck on Apple Logo via DFU Mode

If the iPhone is stuck on the white screen of death due to DFU, hold and press the volume up and down buttons along with the side button to restore the iOS software and the firmware. However, it can result in data loss due to restoration, which is why preferring Dr.Fone is ideal.

How to Avoid Getting Stuck on Apple Logo White Screen of Death?

Do not interrupt the process of the iOS upgrade on your iPhone.

If you want to migrate your profile from an older iPhone to a newer one, it would be better first to upload all data to the PC and then extract the same in the more recent version.

Conclusion

As you know, fixing the iPhone stuck on Apple logo can be difficult; try not to interrupt the update process or anything else. If, by mistake, the screen appears, and you cannot access the phone further, use the software from Dr.Fone. It can solve more than 150 issues with the iPad, iPhone, and even iOS. Plus, it is better if your iPhone gets the white screen of death due to jailbreaking, system update, or firmware update. The best thing is Dr.Fone won't cause any loss of data stored on the phone or restore the entire settings you modified.
