### Quick answer

Have you ever received a call from an unknown number and had the question Who Called me and wondered who it was? Or are you fed up with receiving unknown mobile calls the whole day?

Have you ever received a call from an unknown number and had the question Who Called me and wondered who it was? Or are you fed up with receiving unknown mobile calls the whole day? Well, you aren't alone in being one of them.

It is common for a large group of people to receive unknown phone calls throughout the day. These calls could be harmless, useful, or maybe a scam but finding out who was on the other end is always the question. Luckily, a range of applications and websites today help determine unknown calls.

Join us in this article, and we will explore some of the most effective ways to determine Unknown Calls. We have gathered online resources that help reveal the true identity of any unknown callers. So, whether you are curious about a missed call or want to stay safe from unknown call scams, make sure you are still till the end.

## Top 10 Websites and Applications to uncover the identity of an Unknown Call

### 1. Truecaller

Truecaller is a mobile-based application that helps users with caller identification. Truecaller boasts a massive database of phone numbers, allowing for identifying unknown callers in real-time. Its caller ID feature displays the name and location of the user. This feature is helpful while receiving calls from an unknown number. Another of its most useful features is the ability to identify spam calls and block them.

These features make it an effective tool for avoiding unwanted calls. In addition, its' in-app feature allows users to message each other. Truecaller is available in free and subscription versions both. The premium subscription will enable users to identify who saw their profile, allow viewing other profiles in incognito mode, enjoy add free usage, and much more.

Android

iOS

### 2. Whoscall

Whoscall is another smartphone-based application that offers a call identification service. This effective caller ID and call blocker app is available for Android and iOS devices. Whoscall has an extensive database of phone numbers, which helps identify callers from across the world in real time.

It is an effective tool for individuals who often receive unknown international and domestic calls. Whoscall also provides a range of information, including callers' names, phone number data, spam scores, and more. With all this, blocking any numbers or categorizing blocklists is easier than ever. The free version of Whoscall comes with basic features, including caller identification and spam blocking. In contrast, its paid version offers add-free usage, offline caller ID, personalized call screen, and more.

iOS

Android

### **3. Intelius**

Intelius is a highly-regarded online public records and data search engine. It offers a range of services, and phone call identification is one of them. This search engine simply asks users to type the phone number and generates an identification report.

Intelius allows users to determine the full name, known aliases, and available photos of the potential owner of the phone number. The search engine accesses the public database and provides additional information about the owner of the phone number. Intelius's data analytics and advanced algorithms aim to provide up-to-date and accurate information. The platform offers free as well as paid service models to choose from.

### **4. PeopleFinders**

PeopleFinders is an online platform where users can identify person behind unknown phone numbers and various other services. It is a business directory with a Phone number lookup service. This feature allows users to simply type a phone number and get a range of details about the owner. PeopleFinders boast an extensive database, including both landline and mobile numbers.

As you search, the application will generate a report including the number owner's name, address, and other relevant information. PeopleFinders is extremely efficient, and users can choose from its monthly plan or one-time report service. Apart from operating as a website, it also comes as a mobile application for ease of use.

Android

### **5. TrapCall**

TrapCall is an advanced call management application. It comes with various features, including Call recording, Call blocking, and Caller ID identification. TrapCall is easy to use and works on Android and iOS devices. Its Advanced technology allows users to identify the owner of a phone number in real-time. It is even known for unmasking blocked calls effectively.

TrapCall uses various methods for revealing a phone number, and its call data identification is commendable. The app display name and photo of the number owner on the user's device screen. TrapCall also comes with a blacklist option where users can block unwanted callers. Or utilize its whitelist feature and ensure you never miss an important call.

iOS

Android

### **6. CallerSmart**

CallerSmart is free to use application available on the iOS platform. This platform allows users to identify unknown phone numbers, avoid potential scams and block the callers they want. Its real-time caller ID feature identifies calls while they are just ringing. With a large (always-updating) database, CallerSmart can check the name and location behind a mysterious number on your caller ID.

The application uses a community-based spam list where users can find feedback to identify and block unwanted calls. CallerSmart offers a premium subscription service for excellent efficiency and eases, like unlimited reverse phone lookups, access to premium data, and more.

iOS

## **7. NumLookup**

NumLookup is another popular online phone number lookup service for users troubled by unknown calls. This easy-to-use platform offers free services across the world. As you navigate through its user-friendly interface, it will uncover a range of helpful features. NumLookup's speed and accuracy are unmatched, making it one of the top platforms. It quickly leaves you with a report with detailed information about the owner of the unknown number.

The service is designed to quickly search its extensive database of phone numbers and provide you with detailed information about the owner of the phone number. The information may include the owner's name, address, and social media profile. NumLookup offers free and paid benefits; however, paid services are only for select countries.

## **8. SearchPeopleFree**

SearchPeopleFree is a people-finder web platform. It lets you search people, phones, addresses, and emails effectively. This popular and powerful online search engine has a secure connection, and using it is safe and sound. For example, as you type a phone number on SearchPeopleFree, it will generate a detail including the owner's name, address, photo, and other contact information. Its phone call identification service is widely recognized and appreciated for its accuracy.

The platform also offers a range of features, including public record searches, criminal record searches, and background checks. Despite its huge database, SearchPeopleFree is easy to use and provides results quickly. It has a free-to-use platform with a range of services. Additionally, its premium-made platform allows access to additional data points, which can be invaluable for conducting in-depth investigations.

## **9. TruthFinder**

TruthFinder is a public records search engine allowing users to find people by name, phone number, address, or email address. TruthFinder is available for Android and iPhone devices to see the full details of the owner of an unknown number, additional contact information, and social media profiles associated with the same number.

Simply enter a phone number into the TruthFinder search box to learn more about the owner of the phone number, the carrier, and other details. The most significant advantage is that with a TruthFinder account, you can solve the mystery behind an unknown number in minutes. In addition, TruthFinder can assist you in locating someone's phone number or uncovering a person's criminal history.

iOS

Android

## 10. FastPeopleSearch

FastPeopleSearch is the last online platform on our list that identifies who calls you. Its phone call identification feature allows users to identify unknown callers and block unwanted spam calls. Its comprehensive database provides accurate real-time information about the caller. Searching for a number will generate a report including the owner's name, address, and other available details.

FastPeopleSearch offers its services in both free and paid versions. The free version comes with a limit of searches per day. However, the paid version allows users to perform unlimited searches and get more details about the caller. Other services this platform offers include people search, address search, and background check.

## Wrapping up

Overall, there are many effective tools and services available that can help you identify who called you. These phone number-identifying platforms are easy to use and can save you from potential spammers.
