Quick answer

To change your Airtel WiFi password, open the Airtel app or Airtel Thanks app on your phone and log in using your service ID or registered mobile number.

Airtel is one of the world's famous and biggest telecom companies, with its largest operations across 18 countries in Africa and Asia. It has millions of users all around the world and also offers broadband named Airtel Xtream Fibre, fixed-line, DTH services in several cities. Millions of users prefer using Airtel only due to its great offers and affordable plans to the users. It provides fast internet speed both in mobile networks and WiFi networks.

Are you looking for ways to change the Airtel WiFi password and want to know how to change its WiFi password right now? If yes is your answer, then you have come to the right place. Here you would come to know the complete process of changing Airtel WiFi password in straightforward language for sure.

Steps To change the Airtel WiFi Password

Follow the below steps to Change Airtel WiFi Password

- The first step is to open your Airtel app on iOS or Android. If you have not installed it, then you should search and install it from the AppStore/PlayStore
- You are going to see cards at the homepage of your app which summarises all the details about your active subscriptions
- Now you need to tap on the card with your broadband/landline details
- Tap on "Manage Services" on the next page
- Again on the next page, tap on "Change WiFi Password"
- You would be prompted to enter the New password and WiFi name. You can either keep it the same password or change WiFi's password
- After filling up the new password, click on submit and you are done

Steps To Change Airtel WiFi Password using Airtel Thanks App

You should follow the below steps to change your Airtel WiFi password using Airtel Thanks App

- First, you need to open the Airtel Thanks App on your phone. If you have not installed it, then you should search and install it from the AppStore/PlayStore
- Now, you should log in to your Airtel Thanks App. You can log in using your Service ID of your Airtel Broadband Connection. You would get the OTP number on your registered mobile number to log in to the app
- After logging in to the app, you get your Account details on the App Screen. Just click on details regarding your Broadband Account
- Tap on "Manage Services" on the next page
- Again on the next page, tap on "Change WiFi Password"
- Now, you can easily enter the New WiFi password as per your wish. It is also possible to change your WiFi name if you want.

- Just submit it. You have changed your WiFi password successfully.
