How to Install Zoom on Chromebook

It has been quite some time that most of us have been visiting the zoom link of online meetings for different purposes. However, the process of installing zoom on a Chromebook can be complex if you are beating around the bush. So here are different steps that can easily help you install the zoom app for Chromebook.

- The first step is to install the zoom application by visiting the Chrome Web Store and finding it with the help of the search box. The Chrome Web Store will help you with the link to the application. You need to move forward by clicking on the 'Install' option.
 - You should note that the PWA version of Zoom is a progressive web application that is optimized especially for the Chromebook.
 - When you choose to install, you will redirect to a new window. You need to select the app on the app page. Choose the 'add to chrome' button.
 - This selection will initiate the process of adding the app to your Chromebook.
 - The application will ask for permission to access the camera for videos and the microphone for voice. You can choose the 'add the app.' This step will complete the installation process on the Chromebook.
 - If the app is already present, you will see the displayed option to launch the app on your Chromebook.
- Some people are in a hurry and rely on shortcuts. When you have downloaded the Zoom application, you can create a shortcut too. Here are the steps to create a shortcut for zoom.
- First, you need to check whether the shortcut option is available for you or not. The browser has three vertical dots on the top-left corner. Click on it and find the 'more tools' option once it drops down. You can choose to create a shortcut. You can find the new menu. It is present on the left side of the option.

- A new dialogue box will appear. You can spot it in the middle of the screen. When you choose the 'open as window' option, you will see the 'create' option. Rename the application with the name that you want to give to it.

The zoom app for the Chromebook icon is now a part of the Chromebook's shelf.

How to use Zoom on Chromebook

The steps to use the zoom application downloaded on the Chromebook is as follows:

- The basics of using an online application or website are to sign up for its use or log in if you already have an account. So, look for the 'sign-up' button at the top-right side of the zoom website. If you have the Zoom PWA, click on 'sign up free.' The grey box on the left side of the page has it.

- Enter the details like your date of birth and email address. You can also choose to sign up for Zoom with other options like your Google account or Facebook ID. Logging in through your Google account on Chromebook helps to track the logins.

- After enjoying the technical welcome on zoom, you can create your account. The Zoom dashboard can help you host a meeting or schedule it at your convenience. You can also join a meeting from the Zoom dashboard.
