In brief

Are you looking for a best and cheap hosting service for your website, then Interserver will be a best choice. In this article i am going to share the features and my experience with Interserver.

Are you looking for a best and cheap hosting service for your website, then Interserver will be a best choice. In this article i am going to share the features and my experience with Interserver. You will get Shared, Dedicated, Reseller, VPS hosting from Interserver. In this article i will tell you about their Shared Hosting service.

One of the best part of the service is that their server itself and its very cheap too. Their server really performs very well. You will not notice any downtime with Interserver. Its very fast too. Another important thing is their dedicated support. The support team will available online 24x7 and you will get instant reply from them. The team is technically skilled one too. They will fix any issue you are facing with the server. I am really impressed with the support.

One important thing with interserver is their Price Lock feature, In any other hosting, you can see that you have to pay for 1 year, 2 year or 3 year to get the discount rate and if you are paying monthly you have to pay big amount too. But in Interserver, it is not the case, the price when you purchase the hosting will be your lifetime price. ie if you purchase their hosting at \$5 per month, you need to pay \$5 every month. No need to buy for full 1 year or more.

Since you are paying the money monthly, if at any point you need to cancel your account, its very simple too. you do not need to wait for the full 1 year or more like in other hosting. Also, if you are still in doubt with this server, you can do a try for the 1st month too. As a reader of TechRounder, we are giving you a coupon code 'TECHROUNDER' to try the hosting. By using the coupon code you only need to pay \$0.01 for the first month. You can continue after the first month at \$5/month.

Try it now at \$0.01 For First Month

So get your hosting now and i am sure you continue using their service. Below are some of the features of the server
