In brief

Facebook Moments is a free photo-sharing app that uses facial recognition to group your photos by the people in them, then lets you privately share those photos with the relevant friends. The app automatically syncs photos, stores them in a private folder, and is available for both Android and iOS devices.

Facebook launched a new Photo sharing application called Moments. The new application helps users to privately share the photos to their friends. It uses the facial recognition technology. The application automatically sync the photos and it will scan the faces of the people in the photos. It then let you to share those photos to those friends privately.
