In brief

We all know pCloud is one of the most popular cloud storage services available now with their unique features. Now, a new cloud storage service is available, similar to pCloud called the Icedrive.

We all know pCloud is one of the most popular cloud storage services available now with their unique features. Now, a new cloud storage service is available, similar to pCloud called the Icedrive. But, before proceeding further, we would like to say that we cannot compare Icedrive with pCloud even though both have similarities. The main highlight of Ice drive is that they provide 10GB of free cloud storage which you can expand up to 1TB.

Icedrive is a new addition to the cloud storage service and is provided by a UK-based company, whereas pCloud comes with Swiss-based privacy protection. But what makes Icedrive attractive at the first look is its design. Its web app and mobile app follow the material design with a clean and attractive style.

Icedrive Black Friday & Cyber Weekend Sale 2021

Icedrive is conducting the 2021 Black Friday and Cyber Weekend Sale now. If you wish to get the Lifetime Cloud storage deal, grab it right now. The Black Friday Deal from Icedrive is live now, and you can get 3TB Storage at \$459 and 8TB storage at \$799. The new lifetime plans are named Pro Plan III and Pro Plan VIII, respectively. The massive discount will be available until November 30th. Grab the deal right now.

Features of Icedrive Cloud Storage

Some of the main features of Icedrive includes:

1. Drive Mount For PC

Icedrive Windows application provides drive-based access in which the Icedrive storage will mount on the system like an external hard drive. However, the application will not utilize system storage to store and Sync files. Instead, all the files and folders added to the Icedrive cloud drive will be automatically synced to the cloud server. And the files will be accessible from the web and other mobile apps instantly.

2. Inbuilt Photo Viewer and Video Player

The Icedrive web and mobile app provide an inbuilt photo viewer and video player so that you can view any video files or images without the help of any 3rd party applications.

3. Sync between applications

It will sync files available on Icedrive storage with mobile and web apps simultaneously as other cloud storage. But from the experience, the sync speed of Icedrive is not as fast as expected. Hence the syncing speed is a bit disappointing when we compare it with pCloud where the service is speedy.

4. Icedrive Applications

Icedrive provides a web-based application along with a Windows application that provides a native drive feature. Icedrive also provides a mobile application, which is available for both Android and iOS.

Icedrive Plans and Pricing

IceDrive Plan details are not quickly available on their homepage. however, you can check the details here.

Icedrive basic plan provides 10GB of free cloud storage, whereas the paid pack in 3 options.

Icedrive Lite Plan - In this plan, users will get 150GB of cloud storage. IceDrive Lite plan comes with a yearly subscription of \$19.99. No monthly subscription is available for Lite Plan.

Icedrive Pro Plan - In this plan, users will get 1TB storage. The monthly subscription of the Pro plan will cost \$4.99, and the yearly subscription cost \$49.99, where the cost per month is reduced to \$4.17.

Icedrive Pro + Plan - The Pro Plus Plan will provide 5TB storage. The price for the plan is \$17.99 if you subscribe to a monthly plan and \$179.99 (\$15/month) for the yearly plan.

With all the paid plans, IceDrive also offers a Client-Side encryption feature. If you wish to grab a lifetime deal, you can go for that too. Icedrive offers three lifetime programs.

The lifetime Lite Plan will cost \$59, the Pro plan costs \$149, and the Pro Plus Plan comes with \$499.

Conclusion

As mentioned above, Icedrive has some similarities like pCloud that includes Native windows drive and the lifetime subscription, the monthly bandwidth rule, etc. However, we cannot compare both services together. pCloud has now made its presence in the market and has stable performance. However, Icedrive is still in the initial stage and the speed and sync of Icedrive are not at all good. But, with comparatively cheaper price, it's worth trying Icedrive too.
