In brief

If you're a QLink wireless user looking to configure your mobile device for optimal data and MMS services, the following APN settings will ensure your device is properly connected to the QLink network. These settings are essential for sending and receiving MMS, browsing the internet, and for other data services.

If you're a QLink wireless user looking to configure your mobile device for optimal data and MMS services, the following APN settings will ensure your device is properly connected to the QLink network. These settings are essential for sending and receiving MMS, browsing the internet, and for other data services. Follow the details below to manually set up your device:

- Name: QLink
- APN: cinet.spcs
- Proxy: Not set
- Port: Not set
- Username: Not set
- Password: Not set
- Server: Not set
- MMSC: <http://mms.sprintpcs.com>
- MMS Proxy: 68.28.31.7
- MMS Port: 80
- MCC: 234
- MNC: 15
- Authentication Type: PAP
- APN Type: default, supl, mms

Please note, the above settings may require updating based on your specific device or any network updates from QLink. Always ensure to save the settings before exiting the APN settings menu on your device to ensure changes take effect.
