In brief

Real Debrid is a paid multi-hoster service that provides access to premium download links from 56 supported hosts, delivering buffer-free HD streaming on Kodi and FireStick apps. Plans start at roughly \$3.61 for 15 days, with the most popular option being 90 days for about \$10.82.

Real Debrid is a downloading service with no restrictions and will lessen buffering for streaming applications and Kodi add-ons that dispense media content. In addition, the Real-Debrid, which is a multi-hoster, provides high-quality links hosted on unrestricted servers - making your streaming experience smooth.

What is Real Debrid?

Real Debrid collects links from 56 supported hosts, including hosts like Mega, Big4Shared, Data File, Filefactory, and more. Each host provides premium content, and many of them will typically need you to purchase for a subscription. The multi-hoster simplifies the procedure of obtaining these links. It even reduces the cost that people will have to incur to acquire such content.

Why have a Real Debrid account?

If you're fond of streaming movies, television shows, documentaries, etc. - below are the reasons why you need to have a Real Debrid account:

You can stream High Definition (HD) content on Kodi without buffering. Getting a Real Debrid allows you to integrate the multi-hoster on your Kodi. This is because Kodi is the most popular streaming app - props to its amazing functionality and the numerous Kodi add-ons available.

If you've installed some of the great Kodi addons, you may notice that you can stream nearly all titles that you want. Nonetheless, the majority of the streams are not usually High Definition, and the ones that are in HD usually have tons of buffering. This transpires because you are streaming free content, and those streams are hosted on servers that limit the bandwidth.

Also, those streams are being used by many users across the globe - bringing the performance down. With Free Debrid, you'll obtain new links that are unavailable to other users. These links allow you to stream with speeds of up to 1000 Mbps. Therefore, you'll have to say goodbye to buffering.
