Quick answer

If you are using the MyFiosGateway Router from Verizon, make sure to change the default password of the Wifi Router before connecting your gadgets or devices to the router. Here we are listing three different methods available to change the default password of the MyFiosGateway Wifi Router.

If you are using the MyFiosGateway Router from Verizon, make sure to change the default password of the Wifi Router before connecting your gadgets or devices to the router. Here we are listing three different methods available to change the default password of the MyFiosGateway Wifi Router. So before going into the details, let's see some quick information.

What is a MyFiosGateway Router

Verizon offers its users several internet plans, whether commercial or home usage. Once high-speed Fiber optics were introduced, the company provided a Fiber Optic Service to its home users named Fios Home Internet Plan. The Fios service is bundled with Internet, Telephone, and TV services using the same Optical Fiber Connection. The name Fios is the short form of Fibre Optical Service.

To deliver all the services via the same Optical Fibre, they used high-security and high-speed Gateway routers for the Fios Internet Plan. MyFiosGateway Wifi Router does the job of delivering this bundled internet service. It is capable of even streaming 4K media content, IP Telephony, and all others using the same Gateway Router. MyFiosGateway Router is a central hub that helps transfer media between devices connected to the same network and outside.

How to Change the Password on MyFiosGateway Router

Like the other routers, the MyFiosGateway Verizon router has one default password. It can be found printed on the device itself. Unfortunately, many users continue using the same default password for the router, which can cause some security issues. So here we are checking how to change the password of the MyFiosGateway Wifi Router.

MyFiosGateway Password change can be done in three different ways. So let's see the myfiosgateway.com change password steps one by one.

Change MyFiosGateway Login Password Using Fios Mobile App

You can change the Myfiosgateway login Password with the help of a mobile app. Verizon offers a dedicated mobile app to manage the Fios Home Internet Plan. You can download the App for your iOS device from App Store or for Android devices from the Play Store.

Step 1: Open the Fios Mobile App, and select the option Internet.

Step 2: From the Internet area, go to the My Network section, and there you can find your Connected Networks.

Step 3: Select the network to which you wish to change the password and click on Edit.

Step 4: Finally, update the new username and password details as per your choice.

MyFiosGateway Password Change via My Verizon Account

In this step, you can change the password by visiting the Myfiosgateway.com website if you have a Verizon account.

Step 1: Log in to the Myfiosgateway.com website using Verizon Account.

Step 2: Now, go to the services section and click on the Internet option.

Step 3: From the Internet section, find the My network option and select the desired network to which you wish to change the password.

Step 4: As we did in the mobile app, update your username and passwords to get it done.

Manually Change Myfiosgateway Password From Your Network

To do this, first, ensure you are connected to the same network where you wish to change the password.

Step 1: Open your browser on a PC, Laptop, or mobile.

Step 2: On the browser address bar, enter the IP address of the device, which is 192.168.1.1, and hit enter.

Step 3: Now, you will get a login screen. Login to the router console using your details. Using the default setting, you can find the username and the password printed on the device itself.

Step 4: Once logged in, you can find an option called Change Wireless Settings. Click on that.

Step 5: You can change the default password with your new password in the Wireless settings section.

Frequently Asked Questions about Myfiosgateway

Following are some basic details to know about the MyFiosgateway Verizon Router from your Internet Service Provider.

What is the IP address of MyFiosgateway Router?

The default IP address of the MyFiosgateway Wifi Router is 192.168. 1.1. Enter the URL on your browser to access the router's control panel.

How to Manage MyFiosgateway Router?

You can manage Verizon MyFiosgateway Router via Web URL, My Fios Mobile App, and MyFiosgateway website.

How to Access the Official Website of MyFiosgateway?

You can find all the official information, including the WiFi settings, etc., from the Verizon website. To know more, you can check the Verizon Website.

Why I Can't Access the Myfiosgateway com Website?

The Myfiogateway com website is not available as a public website. So, if you try to access the URL myfiogateway.com from an outside network, you will see only a static page. However, if you are connected to the myfiogateway router, you can use the same myfiogateway com website to access the URL without typing the IP address.

Can I Access myfiogateway.com Webiste from Outside

myfiogateway.com domain is a reserved domain to access the Verizon router. So, once you access the myfiogateway.com website within the network, you will be redirected to the router control panel available at 192.168.1.1. On the other hand, if you access the website myfiogateway.com from outside the network, you will be taken to a Markmonitor parking page.
