In brief

We can change the default Post label from all the section in the WordPress admin panel. Since wordpress uses Post as the default type, it will show Post in all the areas and tabs, search etc.

We can change the default Post label from all the section in the WordPress admin panel. Since wordpress uses Post as the default type, it will show Post in all the areas and tabs, search etc. We can change the Label to a custom Name. For eg. if we are changing the default post type to "News", (Changing of Post Label from admin menu described in another post) Please add the following code in the function.php file

```
function change_post_type_labels() {
    global $wp_post_types;
    // Get the post labels
    $postLabels = $wp_post_types['post']->labels;
    $postLabels->name = 'News';
    $postLabels->singular_name = 'News';
    $postLabels->add_new = 'Add News';
    $postLabels->add_new_item = 'Add News';
    $postLabels->edit_item = 'Edit News';
    $postLabels->new_item = 'News';
    $postLabels->view_item = 'View News';
    $postLabels->search_items = 'Search News';
    $postLabels->not_found = 'No News found';
    $postLabels->not_found_in_trash = 'No News found in Trash';
}
add_action( 'init', 'change_post_type_labels' );
```
