What happened

Last month Xiaomi released their own updated version of OS MIUI 10 with lot of improvements in UI and other features. Now the company is rolling out the MIUI 10 to recently released budget smartphone Redmi 6 Pro too.

Last month Xiaomi released their own updated version of OS MIUI 10 with lot of improvements in UI and other features. Now the company is rolling out the MIUI 10 to recently released budget smartphone Redmi 6 Pro too. The update is also being rolling out to Mi Max and Mi Max Prime too.

Now the users are getting notification for the new system update and the update is almost 609 MB size. The new update bring the new features such as natural sound system based notification. Newly revamped notification panel and volume slider. Also optimized AI feature.

Some of the Highlights of MIUI 10

Some of the main highlights of the new MIUI 10 as follows

Full screen gestures

The new update brings some full screen gestures feature such as 'Go to Home screen', 'Open Recents', 'Go back' and 'Switch between apps'

Notification shade is built for content

The notification panel is now simplified by removing all the unnecessary elements from that.

Recents Apps in the screen

All the recent apps are being placed in the screen with a new look arranging all them in a single full screen for easy selection.

Nature sounds

Most of the system sounds are now changed with natural sounds. It includes notification sounds, system action sounds etc.

Ambient noises

Setting a timer, you can select a sound and listen during the countdown. That way, timer comes in handy not only when you boil eggs, but also when you need a moment to relax and concentrate.

Faster App launch

In MIUI 10, reduced the waiting for the app to load in most cases and go directly to the start page after tapping the icon without having to look at the loading progress bar. This works as fine with third party apps as it does with system apps.

AI Portrait mode

Using Portrait mode doesn't require a dual camera device now. Most single camera phone users will be able to blur the background on their photos after they upgrade to MIUI 10.
