## What happened

As expected, the Xiaomi Mi A2 Lite smartphone will receive the Android 10 update by the end of December or at the beginning of January 2020. As of now, we don't have any official confirmation from the company regarding the update.

As expected, the Xiaomi Mi A2 Lite smartphone will receive the Android 10 update by the end of December or at the beginning of January 2020. As of now, we don't have any official confirmation from the company regarding the update. But from other sources, it is expected to release soon.

Since being an Android One device, Xiaomi Mi A2 Lite along with Mi A1, Mi A2, Mi A3 is also expecting the latest Android Q update. Mi A2 Lite users received the Android 9 Pie update last November once google release the version a few months back in 2018. Similarly, the Android 10 version was released in 2019. So the Android One users are expecting the new update by the end of November.

But for now, it is expected that the new update will be rolled out to Mi A2 and M1 A2 Lite users by the end of 2019 or by the beginning of 2020. Once launched in 2018, the Mi A2 Lite was once of the best and cheapest Android One device that came with good specifications and features. Till now, the device is one of the best stock Android phones available too.

Looking into the features of the device, then Xiaomi Mi A2 Lite comes with a 5.84 inch IPS display with a resolution of 1080 x 2280 pixels along with a display density of 432ppi. Initially, the device was introduced with Android 8.1 Oreo and later upgraded to Android 9 Pie. Now the users are expecting to upgrade the device to Android 10.

The device is powered by a 2.0 GHz Octa-core processor with 4GB RAM and in case of memory, the device features a 64GB inbuilt storage. The handset also comes with a 4000mAh battery which delivers above-average performance. The device also features a 12MP + 5MP dual rear camera and a 5MP front camera. The camera performance of the device is average and the front camera is just only a basic one. The front camera is good for video calls, whereas, it is not at all best for selfies.

## Android 10 Update for Mi A2 Lite

Once the device receives the latest Android Q update, it is expected to improve the performance of the device including the camera and the battery life. Also, regarding the network signal, some users are reporting about the poor signal reception too. We also experienced the issue on some devices. It is also expected to be fixed by the new Android 10 update for Mi A2 Lite. Previously Xiaomi fixed the dual-VoLTE issues with the Android Pie update last year.

Apart from these, once the device receives the latest Android updates, users can experience the new gesture-based navigation and the inbuilt device-specific dark mode feature, which in turn saves battery, etc.

Anyway, we need to wait for one more month at least to get all these features on the Mi A2 Lite.
