Bottom line

It is really safe to say that both Zoiper and Grandstream Wave have become a famous name in the community of VoIP for the users. The VoIP service uses WiFi or mobile data to receive and make calls.

It is really safe to say that both Zoiper and Grandstream Wave have become a famous name in the community of VoIP for the users. The VoIP service uses WiFi or mobile data to receive and make calls. You do not require any mobile coverage or physical SIM card for sure. Grandstream has released some latest products like gateways, IP phones, door cameras and PBX's. Let's understand some of the major differences between Zoiper and Grandstream Wave right now.

Zoiper

Zoiper is a free SIP-based calling application that works perfectly on Android devices. It is also one of the most trustworthy and popular VoIP calling applications used all around the world. It would be better for you to understand that the Zoiper configuration takes only a few additional steps which might be a bit uncomfortable for most of the users. It offers a great and clean calling interface which really looks the same as the default calling application of your phone. The application response time is great when compared with other applications available in the market.

You should understand that the application gets registered so quickly with the network and you would not face any disconnect issue at all. It makes this app stand better and ahead of other apps. The Zoiper app is free to use and you do not have to pay anything for using it. The Zoiper app gives you a great call quality and you are not going to see any advertisement on the app in both paid and free versions. The user interface is clean and understandable even for the new users.

Grandstream Wave

The Grandstream Wave is one of the most famous softphone applications which allow users to make and receive calls easily without any issues at all. This app is free to use and there is no need to pay anything for using it. It is stable with both mobile data and WiFi. The Grandstream call quality is also perfect and the response time is really better. As a user, you can view info of Outgoing and Incoming calls and also missed calls in call history. There are also fully customizable themes and skins for optional branding needs.

The user interface of the app is very simple and easy to understand for the users. You are not going to face any issues or confusion while using it for sure. With the help of Grandstream Wave, residential and business users would have direct and easy access to their SIP lines and can keep in touch with personal or business contacts without buying expensive data plans. It supports advanced SIP telephone features including LDAP phonebook integration, call transfer and many more.

Conclusion

There are many other applications available in the play store which you can try for better experiences. However, Zoiper and Grandstream Wave both are highly recommended if you want to enjoy with no issues at all. You can use both of them without paying anything.

So, what are you waiting for? Use it and share your experiences here.
